

he EndyMed PRO, powered by unique, FDA cleared 3DEEP RF technology, offers innovative and effective aesthetic solutions for nonsurgical lifting, tightening, contouring, skin resurfacing and RF Microneedling for the face, neck and body.

See The Difference 3DEEP Can Make

Unparalleled Treatment Experience

100% safe • Painless and effective treatments • Suitable for all skin types • Immediate and long term superior results • No downtime • Fast treatment times • in-and-out treatments

The PRO is available with a complete selection of exceptional 3DEEP treatment handpieces

Tightening & Contouring

Contour Handpiece Specially designed to provide the ultimate in body contouring and cellulite reduction treatments

iFine Handpiece
Specially designed
for the treatment of
wrinkles and lax skin
on delicate skin tissue
around the eyes and
mouth.

Small Handpiece Specially designed for skin laxity treatment of smaller body areas such as peri-umbilical, neck, arms and knees.

Fractional RF

Large Handpiece Specially designed for the treatment of skin laxity, body shaping and circumference reduction in larger body areas.

Focused RF

Shaper Handpiece For effective body tightening, shaping and cellulite treatments.

Intensif Handpiece
Targeted to treat acne
scars, deep wrinkles,
stretch marks and other
conditions requiring
fractional deep dermal
heating. Available Soon

Mini Shaper Handpiece Focused RF treatment for the jaw-line, under the chin, jawline, arms and knees.

Fractional Skin Resurfacing Handpiece Specially designed for fractional skin resurfacing and treatment of skin roughness, hyperpigmentation, wrinkles and scars on both facial and body areas.

The EndyMed PRO is an all-in-one treatment platform that is flexible and upgradeable, which will grow as your practice grows, delivering impressive ROI.

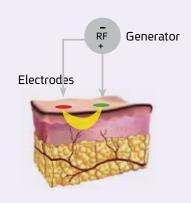

The EndyMed PRO is powered by superior, patented, FDA approved 3DEEP RF Technology. EndyMed's 3DEEP technology is the most powerful and focused skin technology available today. Unlike Monopolar or Bipolar RF technology, which is more superficial and can often be painful or risky to the epidermis, 3DEEP's non ablative skin tightening hand pieces deliver controlled energy to the depth of the dermis, reaching 52°-55°C, with minimal epidermal heat. This

is achieved through gently focusing the device energy into the dermis for optimal, painless collagen remodeling.

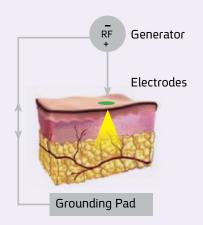

EndyMed's 3DEEP technology incorporates real time skin impedance monitoring, providing the most optimal energy to the treatment target area by making continuous adjustments based on the tissue impedance over the current treatment area.

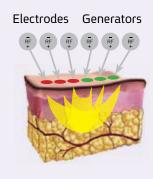

3DEEP - Focused & Deep RF Energy

Bipolar and x-polar RF - relatively superficial and less efficient

Monopolar RF - energy flows uncontrolled in the tissue, requiring intense cooling

3DEEP RF - focused and contained deep energy flow with no need for cooling

3DEEP Popular Treatments

- Fractional resurfacing
- Skin tightening
- Wrinkle reduction
- Body contouring
- Texture improvement
- Cellulite reduction
- Circumferential reduction
- Acne and acne scar reduction
- Traumatic scar reduction
- Stretch mark reduction

EndyMed Medical Ltd., established in 2007, offers energy based medical aesthetic treatment systems for both the professional and consumer markets. EndyMed's proprietary, FDA cleared 3DEEP® radiofrequency technology is a highly effective solution for nonablative and fractional wrinkle treatment, skin tightening on both the face and body, body contouring and acne scar treatment.

EndyMed's unique, patented 3DEEP technology delivers RF energy 3 layers deep into the skin, without any pain or risk, reactivating the natural collagen production to remove wrinkles and noticeably lift and tighten skin.

With 6 RF generators, 3DEEP is the newest, most innovative skin technology available today. 3DEEP delivers focused energy to the depth of the dermis with minimal epidermal heat or pain. 3DEEP delivers deep skin penetration independent of skin color.
